

Endometriosis

1 in 10 Australian women are affected by this painful condition. It is extremely hard to diagnose and can take up to 7-10 years to get the right diagnosis.

Here at Northside Gynaecology, we have a team of female endometriosis specialists who have a range of treatment plans. Below is a series of questions that your GP will ask, which you can either fill out or print out and take with you to your doctor.

Where do you feel the pain?

How bad can the pain be? *minimal* 1 2 3 4 5 6 7 8 9 10 *extreme*

Are you on any contraception? *For example: Pill, Depo Provera, Implanon or Mirena*

Is the pain worse during your period? Yes No	Does it hurt when you go to the toilet? Yes No
--	--

Is there a family history of endometriosis?

Is your period irregular or heavy?

Other questions if applicable:

Is there pain when you have intercourse? Yes No	Are you trying to fall pregnant, unsuccessfully? Yes No
---	---

For the doctor

This questionnaire is intended as a guide only. If in your professional opinion, you think the patient would benefit from seeing a gynaecologist, just send a referral by fax or Medical Objects and we'll take care of the rest.
